

Assignment

The goal of the final presentation is to continue to develop your skills as a presenter and share with the group what you have done in your final project. The talk format is 10 min plus questions (15 min max time). The talk should roughly have the same format as your final paper, with an introduction, methods, results and discussion/conclusions. As we have discussed before, general points for making presentations:

- One slide per minute of talk is a good rule
- Not too much text. Use bullet points
- Use a good balance of text and figures
- Keep your audience engaged
- Make sure your font is legible to the audience, both for text and figure captions
- Tell a story, have some kind of narrative arc in your talk

Talks should be loaded onto github as final_pres_yourname.pdf (or ppt if animations are critical) before the final period.

As per the syllabus, satisfactory completion of the final presentation is required to pass the class.

Assignment Checklist

Student Name:

1. Talk loaded onto github before final
2. Has an introduction/background
3. Methods are presented clearly
4. Results are presented clearly
5. Discussion of results
6. Slides are legible, fonts good size, not too much text
7. Figures are formatted for presentation
8. Speaker engages audience/speaks clearly
9. Speaker keeps on time

Notes:
